4. FIRST AID MEASURES:

| General information | : Get medical advice/attention if you feel unwell. Show this safety data sheet to the doctor in attendance. |
|--|--|
| Ingestion | Call a physician or poison control center immediately. Rinse mouth. Do NOT induce vomiting. If vomiting occurs, keep head low so that stomach content doesn't get into the lungs. |
| Inhalation | Move to fresh air. Call a physician or poison control center immediately. If breathing stops, provide artificial respiration. If breathing is difficult, give oxygen. Get medical attention if symptoms persist. |
| Skin contact | Immediately flush with plenty of water for at least 15 minutes. If easy to do, remove contact lenses. Get medical attention. |
| Eye contact | Immediately flush with plenty of water for at least 15 minutes. If easy to do, remove contact lenses. Get medical attention. |
| Most important symptoms/effects, acute and delayed | : The most important known symptoms and effects are described in the labelling 2. |

|--|---|-----|--|
| Suitable (and unsuitable) e | nguishing media | | |
| Suitable extinguishing media | : Water spray, foam, dry powder or carbon dioxide. | | |
| Unsuitable extinguishing media | : Avoid water in straight hose stream; will scatter and spread fire. | | |
| Specific hazards arising from the chemical | Vapors may cause a flash fire or ignite explosively. Vapors may travel considerable distar to a source of ignition and flash back. Prevent buildup of vapors or gases to explos concentrations. Vapor from the solvent may accumulate in container headspace resulting flammability hazard. Heat may cause the containers to explode. | ive | |

| Special firefighting procedures | : | Use water spray to keep fire-exposed containers cool. Water may be ineffective in fighting the fire. Fight fire from a protected location. Move containers from fire area if you can do so without risk. | | |
| Special protective equipment for fire-fighters | : | Firefighters must use standard protective equipment including flame retardant coat, helme with face shield, gloves, rubber boots, and in enclosed spaces, SCBA. | | |
| 6. ACCIDENTAL RELEASE M | EAS | URES: | | |
| Personal precautions, protective equipment and emergency procedures | : | ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). Avoid breathing mists or vapors. Keep upwind. Ventilate closed spaces before entering them. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Keep unauthorized personnel away. | | |
| Methods and material for containment and cleaning up | : | Eliminate all ignition sources if safe to do so. Use only non-sparking tools. Take precautionary measures against static discharges. Stop leak if possible without any risk. Absorb spill with vermiculite or other inert material, then place in a container for chemical waste. Clean surface thoroughly to remove residual contamination. Dike far ahead of larger spill for later recovery and disposal. | | |
| Notification Procedures | : | Prevent entry into waterways, sewer, basements or confined areas. Inform authorities if large amounts are involved. | | |
| Environmental precautions | : | Do not contaminate water sources or sewer. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground. | | |

7. HANDLING AND STORAGE:

| Precautions for safe handling | Do not handle until all safety precautions have been read and understood. DO NOT handle, store or open near an open flame, sources of heat or sources of ignition. Protect material from direct sunlight. Take precautionary measures against static discharges. Ground/bond : container and receiving equipment. Use explosion-proof electrical/ventilating/lighting/equipment. Use only non-sparking tools. Wear protective gloves/protective clothing/eye Protection / face protection. Avoid contact with eyes, skin, and clothing. Do not breathe |
