Appropriate engineering controls	:	No data available.			
	such	as personal protective equipment			
General information	:	Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.			
Eye/face protection	:	Use tight fitting goggles if dust is generated.			
Hand protection	:	Wear protective gloves.			
Other	:	Wear suitable protective clothing and gloves.			
Respiratory protection	:	In case of inadequate ventilation, use respiratory protection.			
Hygiene measures	:	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Provide eyewash station and safety
