#### 5. FIRE FIGHTING MEASURES:

**General information** 

#### Suitable (and unsuitable) extinguishing media

Suitable extinguishing media	:	Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.
Unsuitable extinguishing media	:	For this substance/mixture no limitations of extinguishing agents are given.
Specific hazards arising from the chemical	:	Vapors may cause a flash fire or ignite explosively. Vapors may travel considerable distance to a source of ignition and flash back. Prevent buildup of vapors or gases to explosive concentrations. Vapor from the solvent may accumulate in container headspace resulting in flammability hazard. Heat may cause the containers to explode.
Special protective equipme	nt an	d precautions for firefighters

Special firefighting		Use water spray to keep fire-exposed containers cool. Water may be ineffective in fighting
procedures	:	the fire. Fight fire from a protected location. Move containers from fire area if you can do so
		without risk.
Special protective		Firefighters must use standard protective equipment including flame retardant coat, helmet
equipment for fire-fighters	•	with face shield, gloves, rubber boots, and in enclosed spaces, SCBA.

#### 6. ACCIDENTAL RELEASE MEASURES:

Personal precautions, protective equipment and emergency procedures	<ul> <li>ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area).</li> <li>Avoid breathing mists or vapors. Keep upwind. Ventilate closed spaces before entering them. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Keep unauthorized personnel away.</li> </ul>
Methods and material for containment and cleaning up	<ul> <li>Eliminate all ignition sources if safe to do so. Use only non-sparking tools. Take precautionary measures against static discharges. Stop leak if possible without any risk.</li> <li>Absorb spill with vermiculite or other inert material, then place in a container for chemical waste. Clean surface thoroughly to remove residual contamination. Dike far ahead of larger spill for later recovery and disposal.</li> </ul>
Notification Procedures	Prevent entry into waterways, sewer, basements or confined areas. Inform authorities if large amounts are involved.
Environmental precautions	Do not contaminate water sources or sewer. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground.

#### 7. HANDLING AND STORAGE:

Precautions for safe handling	Do not handle until all safety precautions have been read and understood. DO NOT handle, store or open near an open flame, sources of heat or sources of ignition. Protect material from direct sunlight. Take precautionary measures against static discharges. Ground/bond : container and receiving equipment. Use explosion-proof electrical/ventilating/lighting/equipment. Use only non-sparking tools. Wear protective gloves/protective clothing/eye Protection/ face protection. Avoid contact with eyes, skin, and clothing. Do not breathe mist or vanor. Use only with adequate ventilation. Wash hands thoroughly after handling
	or vapor. Use only with adequate ventilation. Wash hands thoroughly after handling.

Conditions for safe storage, including any incompatibilities	: Keep away from food, drink and animal feeding stuffs. Keep container tightly closed in a dry, well-ventilated place.
8. EXPOSURE CONTROLS P	ERSONAL PROTECTION:
Control parameters	
Appropriate engineering	
controls	: No data available
Individual protection measu	res, such as personal protective equipment
General information	Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. An eye wash and safety shower must be available in the immediate work area. Use explosion-proof ventilation equipment.
Eye/face protection	Wear safety glasses with side shields (or goggles).
Hand protection	Chemical resistant gloves.
Other	Wear suitable protective clothing.
Respiratory protection Hygiene measures	In case of inadequate ventilation use suitable respirator. Chemical Respirator with organic vapor cartridge. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Provide eyewash station and safety shower. Avoid contact with eyes, skin, and clothing.
