5. FIRE FIGHTING MEASUR	ES:
General information	: Flammable liquid and vapor.
Suitable (and unsuitable) ext	inguishing media
Suitable extinguishing media	: Dry powder or carbon dioxide.
Unsuitable extinguishing media	: Foam, Water.
Specific hazards arising from the chemical	 Vapors may cause a flash fire or ignite explosively. Vapors may travel considerable distance to a source of ignition and flash back. Prevent buildup of vapors or gases to explosive concentrations. Vapor from the solvent may accumulate in container headspace resulting in flammability hazard. Heat may cause the containers to explode.

8. EXPOSURE CONTROLS P	PERSONAL PROTECTION:
Control parameters	
Appropriate engineering controls	: No data available.
Individual protection measu	ires, such as personal protective equipment
General information	Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. An eye wash and safety shower must be available in the immediate work area. Use explosion-proof ventilation equipment.
Eye/face protection	. Wear safety glasses with side shields (or goggles).
Hand protection	Chemical resistant gloves.
Other	Wear suitable protective clothing.
Respiratory protection Hygiene measures	 In case of inadequate ventilation use suitable respirator. Chemical respirator with organic vapor cartridge. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Provide eyewash station and safety shower. Avoid contact with eyes, skin, and clothing.
