| Hazard statement | Causes severe skin burns and eye damage. May cause respiratory irritation. Fatal if inhaled. | |
| Precautionary statement | | |
| Prevention | Obtain special instructions before use. Do not breathe dust/ fume/ gas/ mist/ vapors/ spray. Do not handle until all safe precautions have been read and understood. Wear protective gloves/ protective clothing/ eye protection/ face protection. Keep away from heat/ sparks/ open flames/ hot surfaces. No smoking. Keep container tightly closed. Ground/ bond container and receiving equipment. Use explosion-proof electrical/ ventilating/ lighting/ equipment. Use only non-sparking tools. Take precautionary measures against static discharge. | ety |
| Response | IF exposed or concerned: Get medical advice/ attention. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with wat shower. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses. | - |

| from the chemical | to a source of ignition and flash back. Prevent buildup of vapors or gases to explosive concentrations. Vapor from the solvent may accumulate in container headspace resulting in flammability hazard. Heat may cause the containers to explode. |
|---|---|
| Special protective equipment | t and precautions for firefighters |
| Special firefighting procedures Special protective | Use water spray to keep fire-exposed containers cool. Water may be ineffective in fighting the fire. Fight fire from a protected location. Move containers from fire area if you can do so without risk. Firefighters must use standard protective equipment including flame retardant coat, helmet |
| equipment for fire-fighters | with face shield, gloves, rubber boots, and in enclosed spaces, SCBA. |
| 6. ACCIDENTAL RELEASE M | EASURES: |
| Personal precautions, protective equipment and emergency procedures | ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). Avoid breathing mists or vapors. Keep upwind. Ventilate closed spaces before entering them. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Keep unauthorized personnel away. |
| Methods and material for containment and cleaning up | Eliminate all ignition sources if safe to do so. Use only non-sparking tools. Take precautionary measures against static discharges. Stop leak if possible without any risk.Absorb spill with vermiculite or other inert material, then place in a container for chemical waste. Clean surface thoroughly to remove residual contamination. Dike far ahead of larger |
| Notification Procedures Environmental precautions | spill for later recovery and disposal. Prevent entry into waterways, sewer, basements or confined areas. Inform authorities if large amounts are involved. Do not contaminate water sources or sewer. Prevent further leakage or spillage if safe to do |
| | so. Avoid discharge into drains, water courses or onto the ground. |
| 7. HANDLING AND STORAG | λΕ: |
| Precautions for safe handling Conditions for safe storage, | Do not handle until all safety precautions have been read and understood. DO NOT handle, store or open near an open flame, sources of heat or sources of ignition. Protect material from direct sunlight. Take precautionary measures against static discharges. Ground/bond container and receiving equipment. Use explosion-proof electrical/ventilating/lighting/equipment. Use only non-sparking tools. Wear protective gloves/protective clothing/eye protection / face protection. Avoid contact with eyes, skin, and clothing. Do not breathe mist or vapor. Use only with adequate ventilation. Wash hands thoroughly after handling. Keep away from food, drink and animal feeding stuffs. Keep container tightly closed in a dry, |
| including any incompatibilities | well-ventilated place. Ground container and transfer equipment to eliminate static electric sparks. Comply with all national, state, and local codes pertaining to the storage, handling, dispensing, and disposal of flammable liquids. |

Individual protection measures, such as personal protective equipment

| • | |
|------------------------|--|
| General information | Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. An eye wash and safety shower must be available in the immediate work area. Use explosion-proof ventilation equipment. |
| Eye/face protection | Wear safety glasses with side shields (or goggles). |
| | |
| Hand protection | Chemical resistant gloves. |
| Other | Wear suitable protective clothing. |
| Respiratory protection | In case of inadequate ventilation use suitable respirator. Chemical |
| | respirator with organic vapor cartridge. |
| Hygiene measures | Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Provide eyewash station and safety shower. Avoid contact with eyes, skin, and clothing. |
