2. HAZARDS IDENTIFICATION:

Hazard classification		
Health hazards		
Acute toxicity, Oral	:	Category 3
Acute toxicity, Dermal	:	Category 4
Acute toxicity, Inhalation	:	Category 2
Germ cell mutagenicity	:	Category 1B
Reproductive toxicity	:	Category 1B
Carcinogenicity	:	Category 1B
Specific target organ toxicity - repeated exposure, Oral	:	Category 1
Short-term (acute) aquatic hazard	:	Category 1
Long-term (chronic) aquatic hazard	:	Category 1
Labels elements	:	
Hazard symbol	:	
Signal word	:	Danger
Hazard statement	:	Toxic if swallowed. Harmful in contact with skin. May cause genetic defects. May cause cancer. May damage fertility. May damage the unborn child. Causes damage to organs (Kidney, Bone) through prolonged or repeated exposure Very toxic to aquatic life with long lasting effects.

5. FIRE FIGHTING MEASURES:

General information

Suitable (and unsuitable) extinguishing media

Suitable extinguishing media Unsuitable extinguishing media	Use extinguishing measures that are appropriate to local circumstances and the surrounding environment. For this substance/mixture no limitations of extinguishing agents are given.	
Specific hazards arising from the chemical Special protective equipmen	Nitrogen oxides (NOx) Cadmium/cadmium oxides Not combustible. Ambient fire may liberate hazardous vapors. d precautions for firefighters	
Special firefighting procedures	Use water spray to keep fire-exposed containers cool. Water may be ineffective in fighting the fire. Fight fire from a protected location. Move containers from fire area if you can do so without risk.	
Special protective equipment for fire-fighters	Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA.	

6. ACCIDENTAL RELEASE MEASURES:

Personal precautions, protective equipment and emergency procedures	 ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). Avoid breathing mists or vapors. Keep upwind. Ventilate closed spaces before entering them. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Keep unauthorized personnel away.
Methods and material for containment and cleaning up	 Eliminate all ignition sources if safe to do so. Use only non-sparking tools. Take precautionary measures against static discharges. Stop leak if possible without any risk. Absorb spill with vermiculite or other inert material, then place in a container for chemical waste. Clean surface thoroughly to remove residual contamination. Dike far ahead of larger spill for later recovery and disposal.
Notification Procedures	Prevent entry into waterways, sewer, basements or confined areas. Inform authorities if large amounts are involved.
Environmental precautions	Do not contaminate water sources or sewer. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground.

7. HANDLING AND STORAGE:

Precautions for safe handling	Do not handle until all safety precautions have been read and understood. DO NOT handle, store or open near an open flame, sources of heat or sources of ignition. Protect material from direct sunlight. Take precautionary measures against static discharges. Ground/bond container and receiving equipment. Use explosion-proof
	electrical/ventilating/lighting/equipment. Use only non-sparking tools. Wear protective gloves/protective clothing/eye Protection/ face protection. Avoid contact with eyes, skin, and clothing. Do not breathe mist

	or vapor. Use only with adequate ventilation. Wash hands thoroughly after handling.	
Conditions for safe storage, including any incompatibilities	Keep away from food, drink and animal feeding stuffs. Keep container tightly closed in a dr well-ventilated place.	ry,
8. EXPOSURE CONTROLS P	ONAL PROTECTION:	
Control parameters		
Appropriate engineering		
controls	No data available	
Individual protection measu	such as personal protective equipment	
General information Eye/face protection	Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhau- ventilation, or other engineering controls to maintain airborne levels below recommende exposure limits. If exposure limits have not been established, maintain airborne levels to a acceptable level. An eye wash and safety shower must be available in the immediate wo area. Use explosion-proof ventilation equipment. Wear safety glasses with side shields (or goggles).	ust led an
Hand protection	Chemical resistant gloves.	
Other	Wear suitable protective clothing.	
Respiratory protection	In case of inadequate ventilation use suitable respirator. Chemical Respirator with organic vapor cartridge.	
Hygiene measures	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Provide eyewash station and safety showe Avoid contact with eyes, skin, and clothing.	nd
9. PHYSICAL AND CHEMICA	ROPERTIES:	
Appearance	White to almost-white or colourless crystals	
Odor	Weakly of nitric acid	
Solubility	No data available.
